The following customized services offered to meet clients' specific needs:

BIG-Database:

Xinhua Silk Road Database includes data pertaining to the national and regional economies,social environment, industries and companies. All data is engineered to form a mass multi-dimensional data cube.The mining of data to produce analytical data reports, with multiple dimensions for a particular topic, is quick and simple. A good example of how the data can be useful is the data analysis for monitoring the public opinion. The result of the analysis helps investors to better understand the social and public risks for their investment project.

Credit Reports:

Help investors to collect credit information at various levels. Country Credit, Enterprise Credit and Project Credit reports are readily available.

Consultant and "Think Tank" Reports:

Customized "Think Tank" Research Reportsare made available to meet the clients' particular requirements. When needed, senior consultants with solid expertise in various disciplines can be lined up for providing timely and accurate advice.
